### **DETAILED ACTION**

This action is in response to amendments filed January 4, 2007.

#### ***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR §1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the Issue fee.

Authorization for this Examiner's Amendment was given in a telephone interview with Mr. William S. Foster, Jr. on March 15, 2007.

The claims have been amended as follows:

In claim 1, lines 10-12, the text

--extending in a second direction perpendicular to the first direction,

wherein each part of the plurality of parts is—

has been inserted between the words "part" and "different", and the text "in a second direction perpendicular to the first direction" after the word "another" has been removed.

#### ***Drawings***

The replacement drawing sheets were received on January 4, 2007.

These drawings are acceptable and the objections to the drawings are withdrawn.

***Specification***

The amendments to the specification were received on January 4, 2007.

The revised specification is acceptable and the objections to the specification are withdrawn.

***Response to Arguments***

Applicant's arguments, see pages 7-10, filed January 4, 2007, with respect to claims 1-6 have been fully considered and are persuasive. The rejection of claims 1-6 under 35 USC §103(a) has been withdrawn. The claims are now allowed, and reasons for allowance are provided below.

***Allowable Subject Matter***

Claims 1-6 allowed.

The following is an examiner's statement of reasons for allowance:

The subject matter of the present invention differs from the teachings of the prior art in that the present invention comprises in combination with the other limitations of the first independent claim a curved surface having a plurality of parts extending in a direction parallel to a valve plate in the direction of the movable portion of the valve extending from the fixed end of the valve, wherein each part is different in radius of curvature from one another.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 3746
